Training of HIRARC: A Dynamic tool for smart OSH Practitioner

INTRODUCTION

HIRARC is an integration tool to identify, assess/measure and to control hazard and risk of any workplace and its activities. By strictly implementing it, it will eliminate, reduce/control the possibility for any accidents to occur.

According clause 4.3.1 of OHSAS 18001:2007, an establishment of procedure is a MUST to ensure the identification of risk, risk assessment, and its determination can be implemented and maintained.

The HIRARC training has been designed to cater the needs of RISK MANAGEMENT process. In addition, a tool of HIRARC template is used to drive the method of risk assessment to incorporate with DOSH Guideline 2008 by readily built-in the risk factor and extinguishment of hazard-risk aspects.

This training approach is really effective even though the participant is 'fresh' knowledge about risk assessment

OBJECTIVES

- Familiarize with concept of Hazard and risk in accordance with MSPO model
- Able to structure the process to identify hazard at work place based from nature of operation.
- Better understanding on legislative aspect on OSH in Malaysia
