

ISIS has been designed in a dynamic system that should be fast, efficient, and responsive to the needs of the safety practitioner in fulfilling their routine task. This smart system should speed up to analyse the performance of workplace safety and health condition.

ISIS is workable for;

- **Integrated records** and reports preparation via one process only.
- **Save** time and energy consumption.
- Provide **reports** and **factual** information to support in recommendation for corrective action.
- Describe the **critical analysis** of compliance in practical manner.
- **Paperless** approach.

INTEGRATED SAFETY INSPECTION SYSTEM
