## Sustainability Standards Training Series

### ***Sustainability Reporting IFRS S1 and S2***

#### ***Introduction***

The International Sustainability Standards Board (ISSB) has introduced the IFRS S1 and IFRS S2 standards to provide a globally consistent, comparable, and reliable baseline for sustainability-related financial disclosures. IFRS S1 establishes the general requirements for reporting sustainability-related risks and opportunities, while IFRS S2 provides specific requirements for climate-related disclosures, building on the TCFD framework.

This 2-day training programme is designed to equip participants with the knowledge, skills, and practical tools necessary to understand, interpret, and implement IFRS S1 and S2 within their organizations. The course combines theoretical learning with interactive case studies, practical exercises, and group discussions to ensure participants can confidently apply the standards in real-world reporting contexts.

#### ***Training Objectives***

This course aims to provide participants with knowledge and understanding on:

- 1) Understand the background, scope, and objectives of ISSB and the IFRS Sustainability Disclosure Standards.
- 2) Interpret the core requirements of IFRS S1 (General Requirements for Sustainability-Related Financial Information).
- 3) Apply IFRS S2 (Climate-Related Disclosures) to identify, assess, and disclose climate-related risks and opportunities.

#### ***Duration***

2 days

#### ***Target Participant***

Sustainability / ESG Managers and Executives, Finance and Accounting Professionals, Risk Management Officers
