

Training Outline

OSHE Management System Training Series

Identifying Environmental (ISO 14001) Aspects and Impacts Management

Training program overview

This course explains the environmental aspects and impacts of an organization. It helps participant to deliver an 'auditable' output to the organization that is conforming to the ISO 14001: Standard. This environmental aspect and impact assessment course is designed for the employee directly involve in operation for the completion of environmental aspect and impact assessments across their company's activities.

No previous knowledge is required of the aspect and impact assessment process to attend this course. The course will provide the participants with knowledge of the assessment process to enable compliance with ISO 14001, reduce the business environmental impacts, reduce their carbon foot print and be able to demonstrate good environmental management. The delegate will leave with an action plan and documentation for completing environmental aspect and impact assessments.

Training Objectives

1. Explain the environmental aspects and impacts of an organization.
2. Construct a simple methodology for identifying aspects and determining impacts.
3. Put the identification methods you learn into practice.
4. Deliver to your organization an 'auditable' output that is conforming to the ISO 14001: Standard.
5. Lead your organization through the processes of identifying its environmental aspects and determining impacts.

Training Scope / Guideline

1. Environmental management systems — Requirements with guidance for use (FDIS ISO 14001:2015)

Target Participant

Manager, Administration Officer, Internal Auditor

Training outline (1 day duration course)
