

Training Outline

OSHE Management System Training Series

Emergency Response Plan (ERP)

Overview

Emergencies and disasters can happen without any warning and happen at any time. Companies need to be prepared for emergencies and the better they can act the less likely they are to reduce panic and confusion when emergencies occur. The purpose of this training is to help employers develop an emergency response plan that will meet the specific needs of their operations. The program trains from the aspect of emergency management and how to plan preparations so that the Emergency Response Plan (ERP) works best when an emergency occurs and resources such as the Incident Command System (ICS) and ERT are able to be utilized according to optimal capabilities.

Training Objectives

Successful completion of the program will enhance the skills of participants and enable them to :-

- ✓ Demonstrate the capability to implement Emergency Management and Planning
- ✓ Develop and evaluate the components of a Hazard Vulnerability Analysis and Risk Assessment
- ✓ Develop and evaluate the components of an Emergency Operations Plans and Continuity of Operations Plans
